Palindrome

PALINDROME

Write a Java program to check if a given string is a palindrome or not.

PROGRAM EDITOR

Java

Run

Save

```
1 public class Main {
2     public static void main(String[] args) {
3         String s = "madam";
4         s = s.toLowerCase();
5         int i = 0, j = s.length() - 1;
6         boolean palindrome = true;
7         while (i < j) {
8             if (s.charAt(i) != s.charAt(j)) {
9                 palindrome = false;
10                break;
11            }
12            i++;
13            j--;
14        }
15        System.out.println(palindrome ? "Palindrome" : "Not Palindrome");
16    }
17 }
```

OUTPUT

Palindrome

Occurrence

OCCURRENCE

Write a Java program to count the number of occurrences of a given character in a string.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.*;
2 public class Main {
3     public static void main(String[] args) {
4         String str = "programming";
5         Map<Character, Integer> counts = new HashMap<>();
6         for (char c : str.toCharArray()) {
7             counts.put(c, counts.getOrDefault(c, 0) + 1);
8         }
9         System.out.println("Character Occurrences: " + counts);
10    }
11 }
12
13
```

OUTPUT

Character Occurrences: {p=1, a=1, r=2, g=2, i=1, m=2, n=1, o=1}
